Summary

The beginning of the Russia-Ukraine war dates back to Russia's annexation of Crimea in 2014. The political tension that erupted in 2021-2022 was the last straw and Russian forces took action on Putin's orders. Taking action on February 24, 2022, Russian forces launched a large-scale invasion of Ukraine. Russian President Vladimir Putin claims that this is not an invasion, but that Russia is protecting its geopolitical interests in the region, its citizens and its deployed soldiers.

This report is the 4rd Report in a series of investigations on threat actors playing an active role in the Ukraine-Russia war, based on the IT Army of Ukraine report shared by ThreatMon earlier.

Cyber Wars in The Ukraine-Russia War

In 2014, Russia annexed Crimea, leading to conflict in the Donbass region and the start of a cyber war between Ukraine and Russia. Since then, Ukraine has been a frequent target of Russian cyber attacks, including ransomware, DDoS, and data manipulation. These attacks have targeted critical sectors such as energy, finance, and communication.

One of the most notable cyber attacks on Ukraine occurred in 2015 when parts of the country experienced power cuts. The attack was allegedly carried out by the pro-Russian group Sandworm, which targeted the country's electricity grid. This cyber attack caused a worldwide debate on cybersecurity and served as a wake-up call for Ukraine to take stronger measures on cybersecurity.

Following the attack, Ukraine implemented several measures to enhance its cybersecurity capabilities. The country established a National Coordination Center for Cybersecurity and developed a national cybersecurity strategy. Additionally, the government introduced legislation to strengthen cybersecurity regulations and established partnerships with international organizations to share best practices and expertise.

Despite these efforts, Ukraine remains a target for cyber attacks from Russia. In 2017, the country was hit by another cyber attack, the NotPetya ransomware attack, which caused widespread disruption in Ukraine and other countries. The attack is believed to have been carried out by Russian hackers and caused billions of dollars in damage.

Ukraine's experience highlights the growing threat of cyber attacks and the need for countries to take cybersecurity seriously. As technology continues to advance, the risk of cyber attacks is only going to increase. Therefore, countries must continue to invest in cybersecurity measures to protect themselves from these threats.

Threat Actor Review: IT Army of Ukraine

Who is IT Army of Ukraine?

Two days after the Russian invasion, which started with Putin's announcement of a "special military intervention" on television on February 24, 2022, Ukraine's deputy prime minister and minister of digital transformation, Mykhailo Fedorov, announced the creation of a volunteer cyber army. Volunteers joining the group were divided into units to carry out DDoS attacks and the more experienced to perform complex cyber operations.

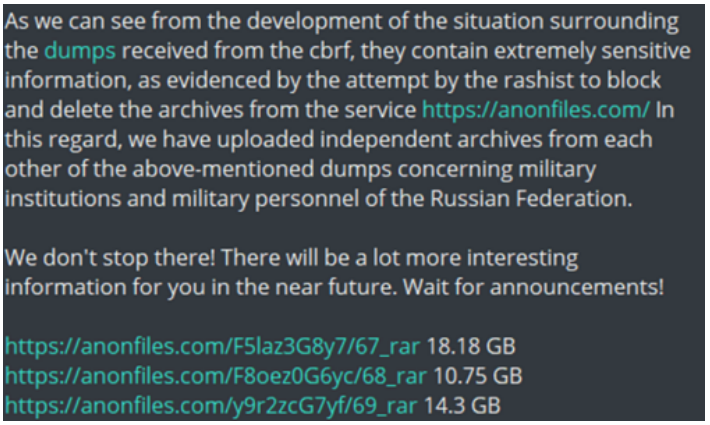

IT Army of Ukraine uses Twitter and Telegram channels to announce the attacks. A website has been created so that more volunteers can participate and the IT Army can install the tools it has developed, and the attacks and the consequences of their attacks are shared on Telegram channels.

Which Side They Supports?

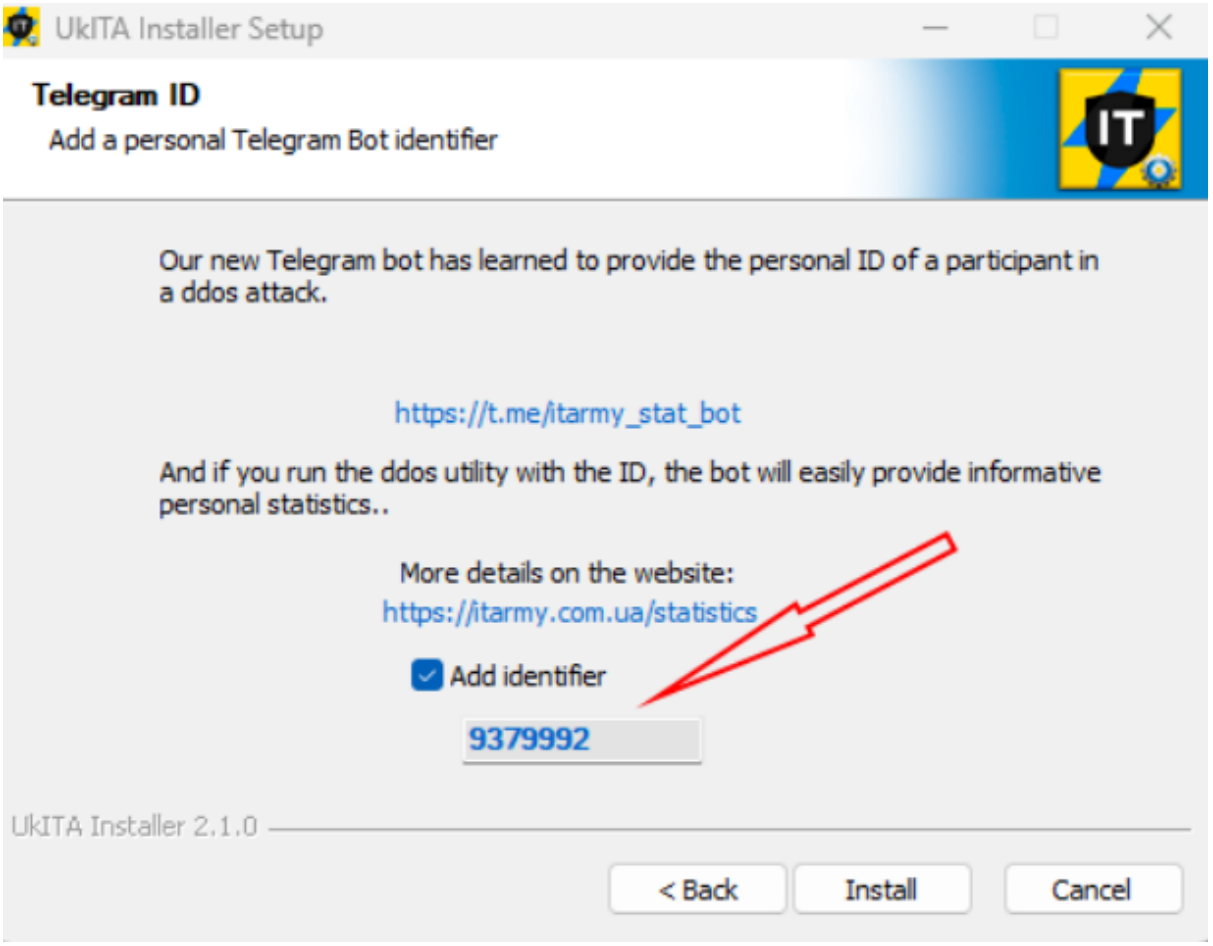

IT Army of Ukraine is a hacking group affiliated with Ukraine.

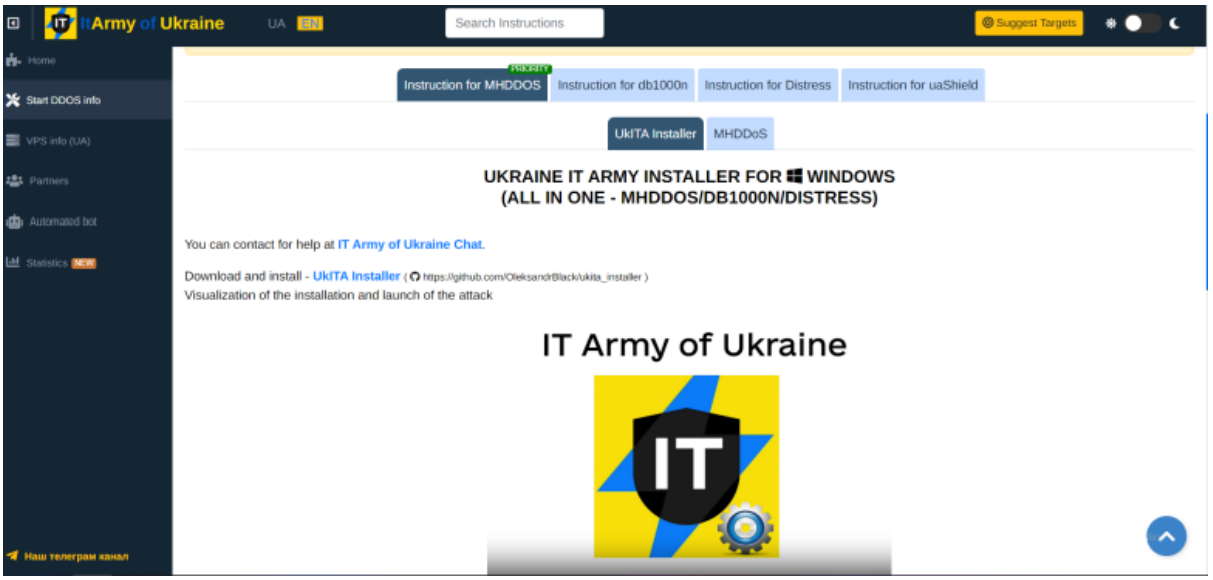

What Types of Attacks Does IT Army of Ukraine Execute?

IT Army of Ukraine carries out DDoS (Denial-of-Service) attacks on the websites and networks they specify. These DDoS attacks sometimes happen to make a website completely unusable, and sometimes it happens to temporarily stop or slow down some systems to harm Russia's economy. As a result of these attacks, confidential information of the attacked systems is also leaked, and they share them in the Telegram group.

They support these attacks with tools they wrote themselves or with open source proxies such as "Death By 1000 Needles" or "mhhddos_proxy".

UkITA Installer Setup
Telegram ID
Add a personal Telegram Bot identifier
Our new Telegram bot has learned to provide the personal ID of a participant in a ddos attack.
https://t.me/itarmy_stat_bot
And if you run the ddos utility with the ID, the bot will easily provide informative personal statistics..

Which Sectors Is IT Army of Ukraine Targeting?

IT Army Of Ukraine has targeted almost all sectors in the last year. In total, it has carried out DDoS attacks by sharing over 9,100 individual IP addresses and URLs on the Telegram channel. In order from most to least:

- Government-run Websites (Courts, Ministry Of Foreign Affairs, Post Office, Russian Parliament, Beverage Delivery Service…)
- Bank, Payment Systems And Stock Market (Qiwi, Gazprom Bank, Central Bank, Paytrans, Alfa-bank, Moex, Sberbank…)
- Media (Mk.ru, Gazeta.ru, Aif.ru, Tass.ru…)
- Propaganda Websites
- Auction Sites (Rosltorg)
- Television Channels And Services (Okko.tv, Wink.ru)
- Video Conferencing Apps/sites
- Logistics (Ati.su, Datrans.ru, Dellin.ru)
- Audit And Accounting Services
- Sites Selling Military Equipment (Voentorg, 2gis)
- Websites Of Terrorist Groups Against Ukraine
- Ticket Reservation Sites (Booking Website)
- Websites Selling Unmanned Aerial Vehicles (Copter Drone Shops, Citilink.ru)
- University Websites
- Insurance Companies
- Holdings
- Courier Services (Express.dhl.ru, Boxberry.ru)
- Cinema And Tv Series Services
- Telecom And Communication Companies (Crelcom.ru)
- Internet Service Providers (Farline.net, Miranda-media, Dom.ru)
- Airlines
- Food Delivery Sites (Vkusvill.ru, Smokat.ru, Utkonos.ru)
- Electronic And E-commerce Sites (Wildberries.ru, Ozon.ru, Chipdip.ru)
- Veterinarians (Vetis)
- Petrol And Gas Trading Sites
- Freelance Platforms (Fl.ru, Advego.com)
- Job Sites (Superjob, Hh.ru, Zarplata.ru)
- Ddos Guards
- Automotive Industry (Drom.ru, Exist.ru, Autodoc.ru)
- Importer Companies (Dns-shop.ru)
- Search Engines

Many other industries have been the target of these attacks.

IT Army of Ukraine's Attacks

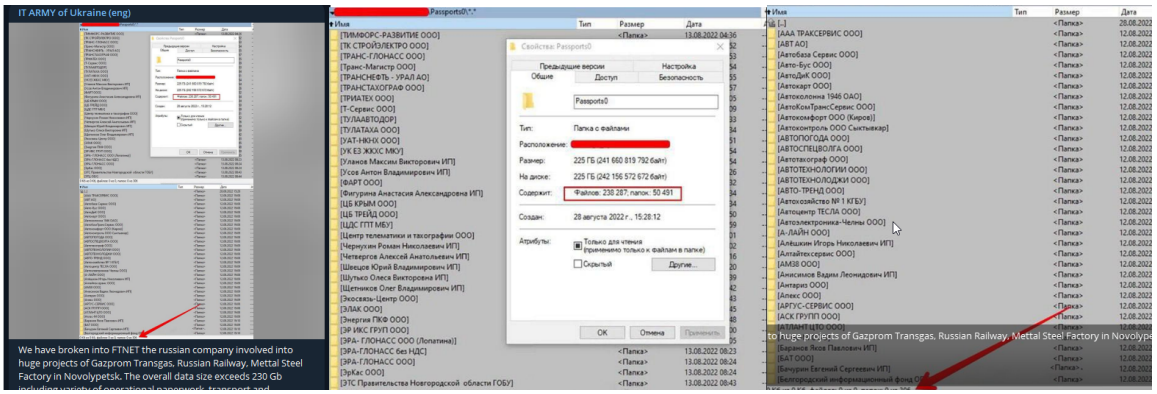

Here are some examples of cyber attacks involving IT Army of Ukraine directly or indirectly:

Example attacks

October 24, 2022

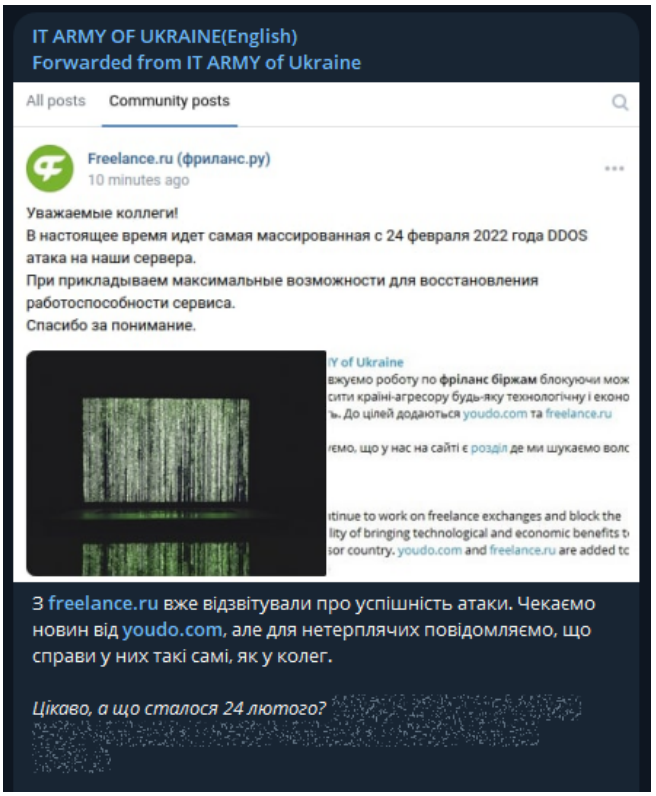

On October 24, 2022, the IT ARMY of Ukraine group accessed and extracted more than 230 Gb of large databases of its victims. This data included various operational documents, transportation and employee profiles.

Gazprom Transgaz, Russian Railways, Mettal Steel Plant in Novolypetsk, Russian company FTNET

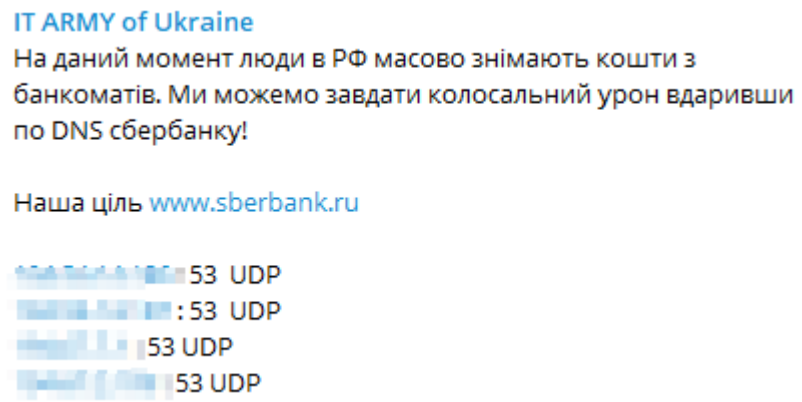

December 22, 2022

On December 22, 2022, the IT ARMY OF UKRAINE group was behind the attack on Russian-affiliated freelance.ru. With DDoS attacks, they forced the victim to remain offline for a certain period of time.

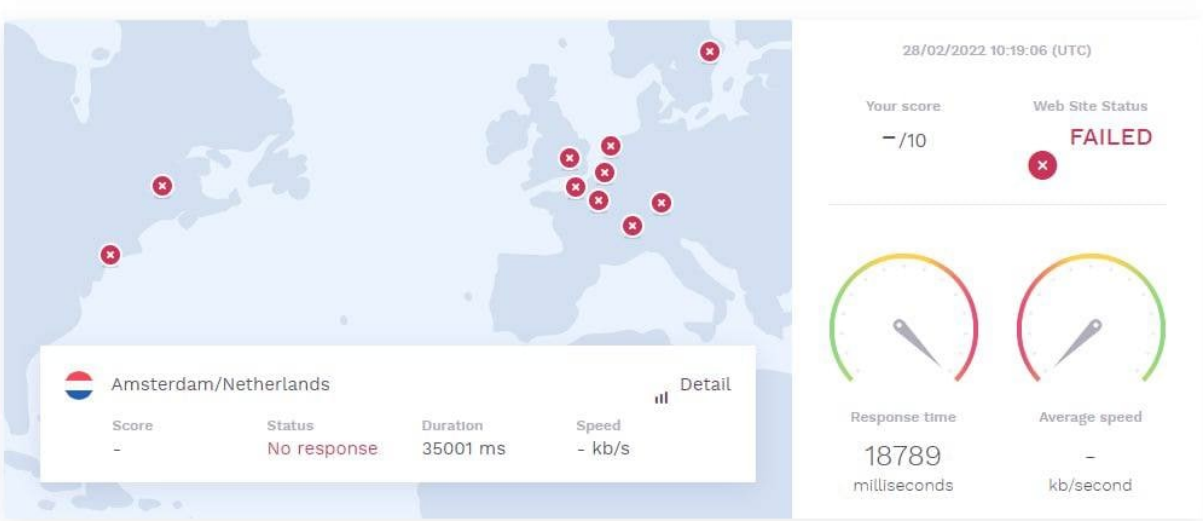

February 28, 2022

On February 28, 2022, Sberbank main domain and many ATMs became unusable due to DDOS attacks on Sberbank DNS servers.

January 16, 2023

January 16, 2023 After the attack on the Russian Regional Development Bank, they caused the fuel cards to not work at the gas stations.

IT ARMY OF UKRAINE(English)
Forwarded from IT ARMY of Ukraine

На многих заправках в Башкирии стало проблемой расплатиться картами

Причина может быть на стороне подсанкционного банка ВБРР - партнера «Роснефти».

(**10 января 2023 09:31** , ИА "Девон")
В Башкирии на автозаправках «Башнефти» (группа «Роснефть») с 9 января отмечены сбои при оплате безналичным способом. Страдают как обычные автовладельцы, так и организации. Например, водителей скорой помощи предупредили о возможных перебоях при оплате топливными картами и предложено в таких случаях платить наличными с сохранением чеков. Об этом сообщило издание UFA1.RU.

На горячей линии «Башнефти» сообщили, что проблема уже устранена на части АЗС, но на некоторых заправочных станциях всё еще могут наблюдаться сбои.

January 25, 2023

Owned by Russia on January 25, 2023 They targeted digital accounting firm Sbis.

```

February 20, 2023

February 20, 2023 QIWI Bank, headquartered in Cyprus, suffered a cyber attack that damaged its reputation with its customers.

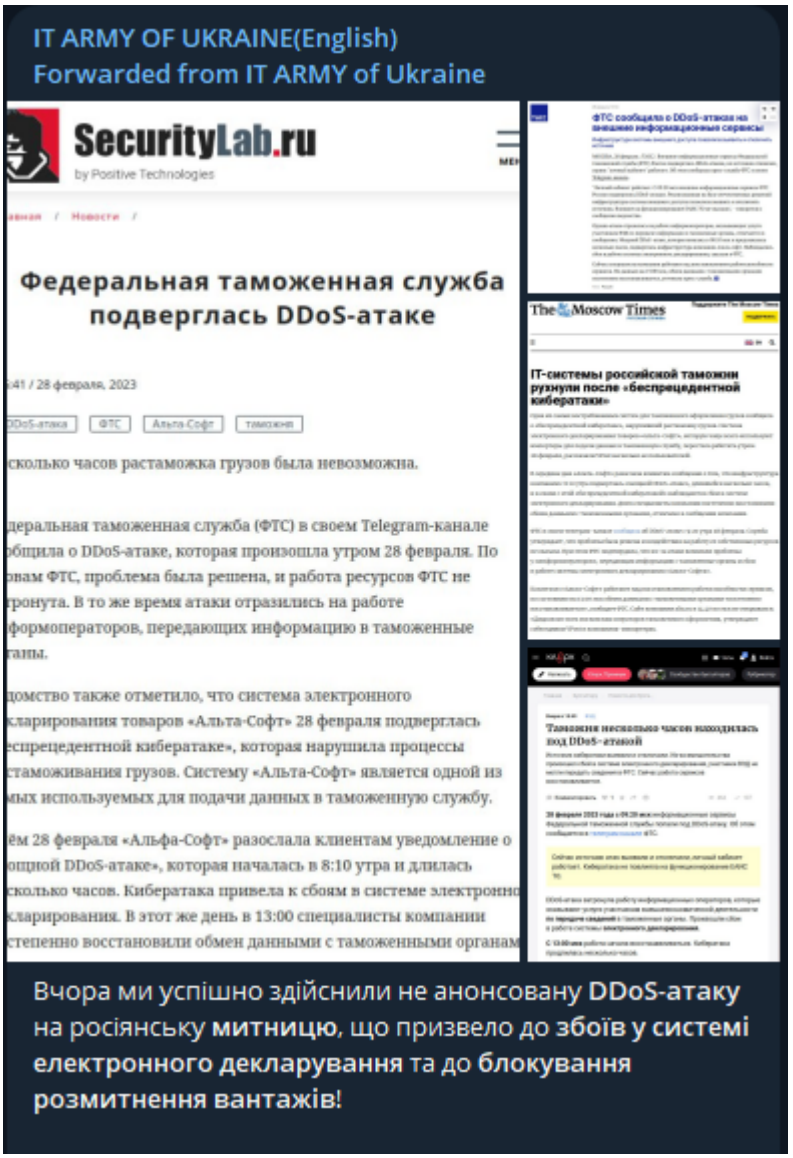

February 24, 2023

IT ARMY OF UKRAINE February 24, 2023 The Russian digital bank blocked its operations as a result of a DDoS attack against Tochka.

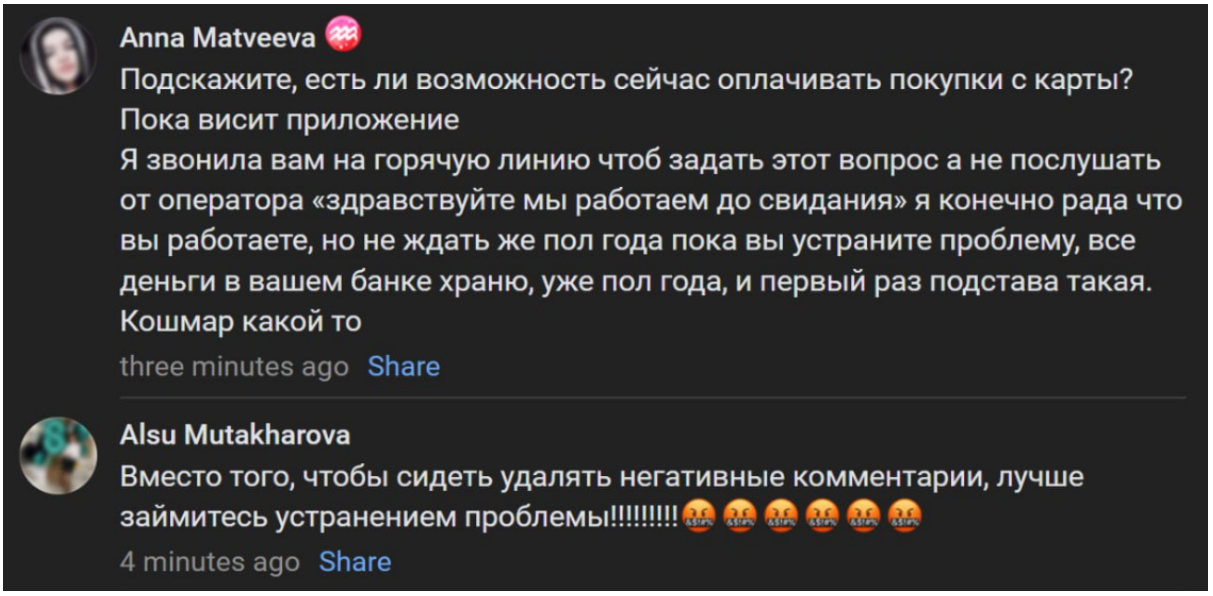

March 1, 2023

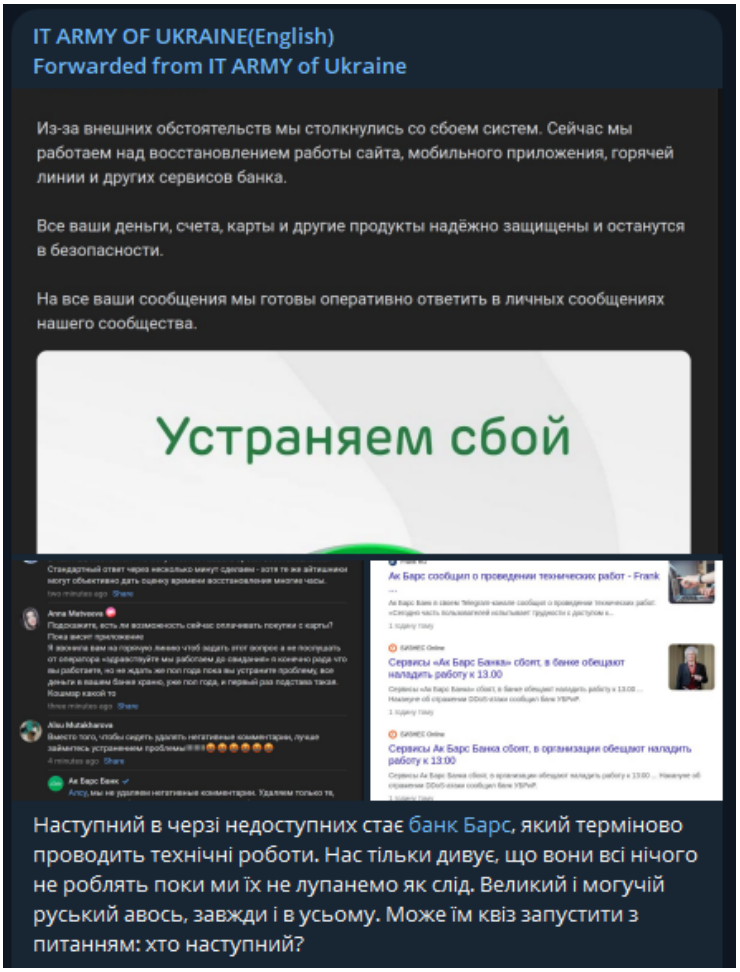

March 1, 2023 IT ARMY OF UKRAINE carried out a successful DDoS attack on Russian customs, leading to a system failure in the electronic declaration process and blocking the cargo customs clearance procedure.

March 15, 2023

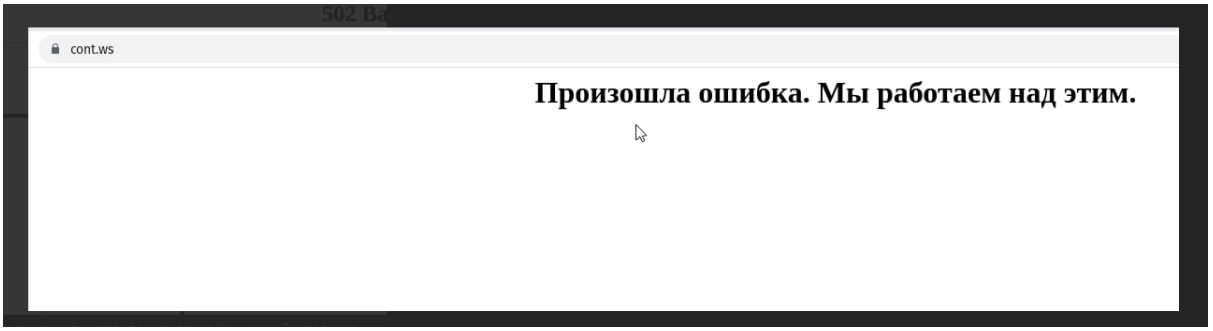

On March 15, 2023, the targeted Bank Bars fell victim to DDoS and lost many of its customers. So the IT ARMY OF UKRAINE group got what it wanted.

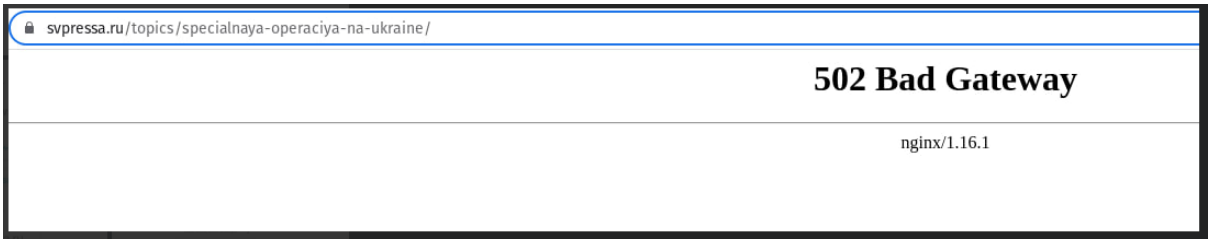

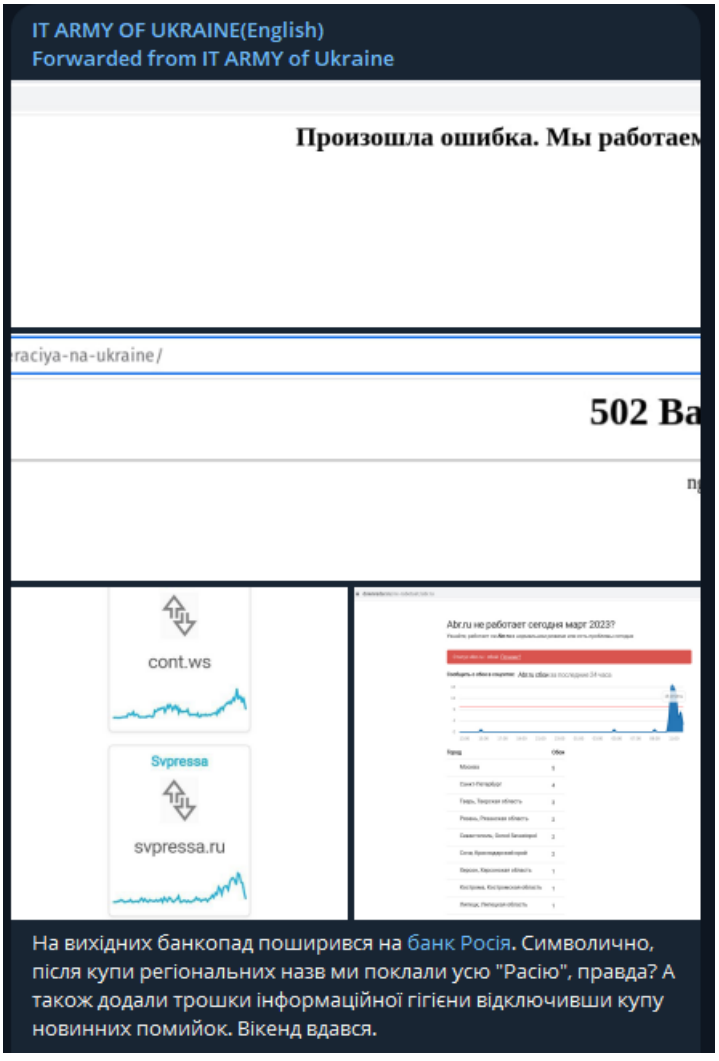

March 20, 2023

On March 20, 2023, the banking system "ABR Bank" fell victim to a DDoS attack that interrupted all its operations.

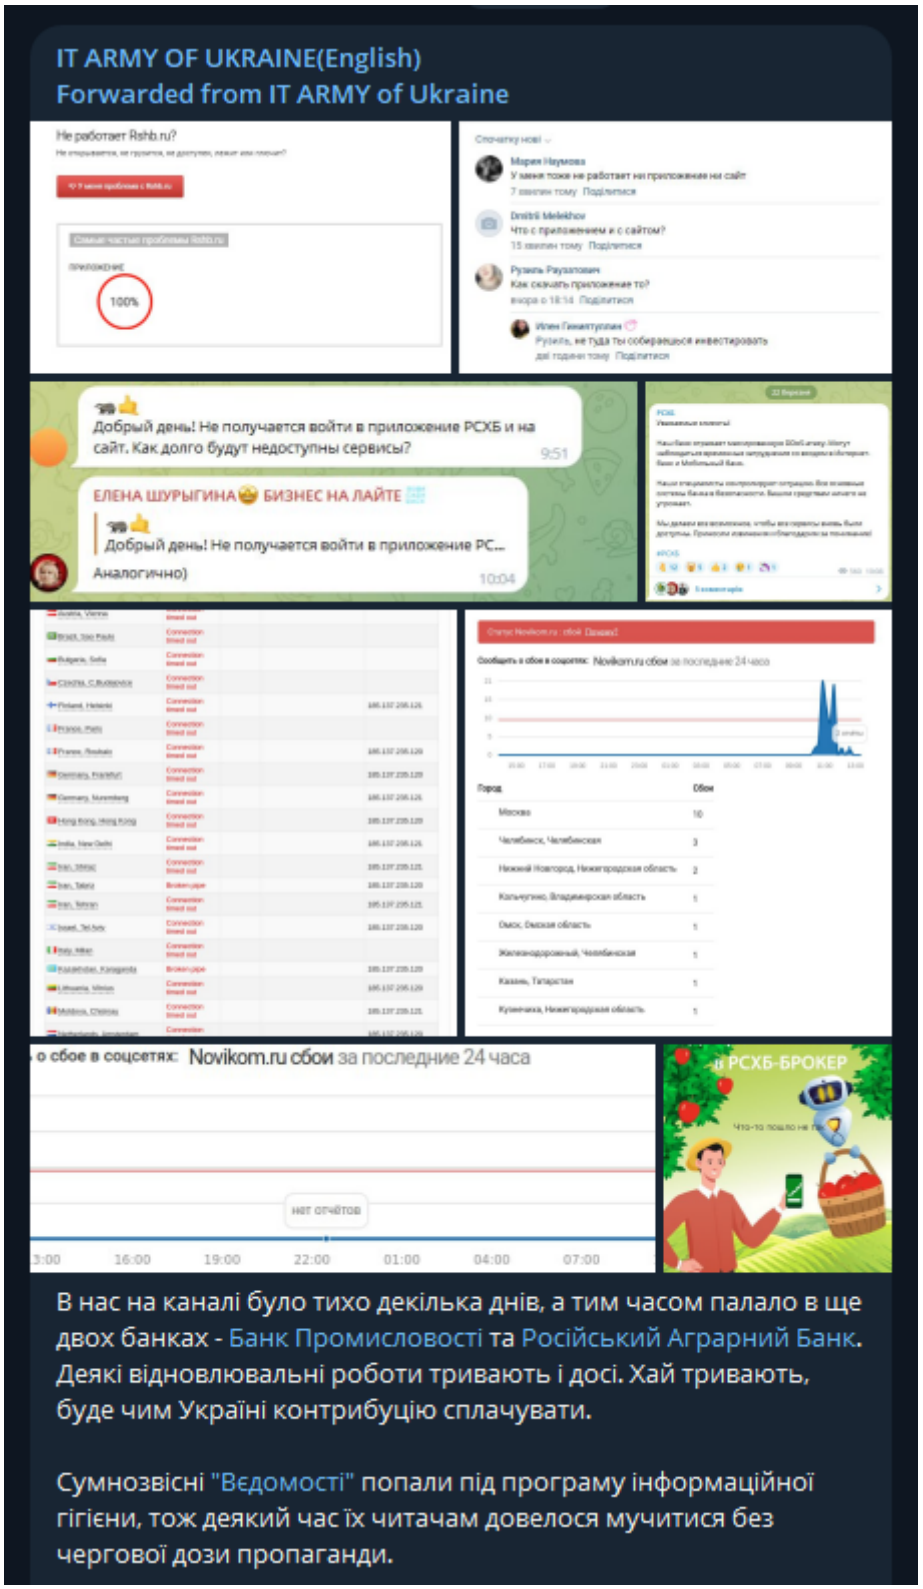

March 25, 2023

On March 25, 2023,IT ARMY has been silent for a few days, but during this period, they launched DDoS attacks on two important banks belonging to Russia, Novikom and Russian Agrarian Bank, rendering them unusable for a certain period of time.
